on the children**

For All Children

The problem we are trying to control is child abuse. We have seen too many cases of child abuse and it seems to be becoming more and more out of control, and we feel we need to group up and make a difference. We have contacted friends, family neighbors, and businesses about the issue. We have been in the neighborhoods contacting our TV Stations, Radio Stations, Churches, Schools City Council, Police Depts., and Businesses. Every contact we have educated about our organization has taken an interest in joining, and has commented "this is a great thing we are trying to achieve". We hope to succeed with posting [Neighborhood Watch for Child Abuse](#) Signs, Bumper Stickers, Our Website, and Eyes of every individual in all our neighborhoods, and all across our nation.

Our Organization plans on making a difference with our signs and joining new Silent Angel members. We think the outcome will be extremely astonishing, because on day one we have had immense responds to people who are furious about all the child abuse that has fallen into the cracks of our legal system. However, we know our legal system is overloaded, so this is why we have decided to group with others and make a new challenge for child abusers. SACS will be notified immediately of a child being abused. We will be in court with the child supporting them, fighting for the child and not the parents, what is best interest for the child. The area will cover is any county of Northeast Arkansas. In the future we hope to expand to state and nationwide. The Board members of SACS will be covering the investigation of child.

As for sustainability and the grace of God, our organization will operate off of donations, fundraisers, art exhibits, raffles, other grants, city-wide yard sales, volunteers, and other organizations. Once the organization grows, we are going to give back to the community, things such as, attorney fees / investigator fees in the future, supplies, advertisement, travel expenses and other necessary expenses for the child that is in an abused situation. Our age group is any child from newborn to eighteen years of age.

Educate - All eyes on Child Abusers!
